

**Tronox Mine Sites R6/R9  
Highways 509 and 605  
Cibola and McKinley Counties, New Mexico  
Daily Report**

**Date:** November 1, 2015

**Team:**

Patrick Buster  
Yellow Jacket Drilling

**Health and Safety:**

1. Weston team safety topics included physical hazards including slips, trips, falls, working in cold and windy conditions.

**Activities Completed:**

1. Yellow Jacket advanced casing to 160' in the borehole to attempt to free core barrel.
2. Weston developed N-5a. 30 gallons of water were removed, and the water column in the well is 22'.
3. Weston identified outcrops of Glorieta Sandstone and San Andres Limestone, obtaining fresh, unweathered samples of each.
4. Weston generated a 5 mile wide cross section in the area where the San Andres/Glorieta formations are exposed.

**Planned Activities for November 2, 2015:**

1. Try to free core barrel and continue drilling NKD-03.
2. Weston will attempt to develop N-11, depending on muddy conditions.

**Schedule:**

1. Next demobilization is the afternoon of Tuesday, 11/3. Remobilization is on 11/9.

**Open Items:**

1. Weston will need to need to coordinate sampling Rio Algom wells MW-35-9 and MW35-9. Due to miscommunication these wells were sampled ahead of the originally \proposed schedule. **MW35-9 and MW35-9 are scheduled to be sampled again sometime during the first two weeks of November by Rio Algom. Weston will plan to collect groundwater samples at this time.**
